

## YOUR TRUCK BREAKS DOWN. IS IT A MAJOR PROBLEM OR A QUICK FIX?

Do you need to have a new truck sent out? Does another driver need to pick up your load? What's the problem? Am I going to need to get a room for the night? All good questions. The answer? Express Assessment from Freightliner. Express Assessment is a new diagnostic service designed to expedite the process of getting your truck repaired and back out on the road.

**At each Express Assessment location, we promise to have a factory certified technician diagnose any single-line problem within two hours of your arrival.**

Once diagnosed, the tech can order any parts they need right away, so you will know how long everything will take right then.

**You can't fix the problem before you find it.**

See your ATC service writer for details.
